

BURNISHING

1. Assemble all equipment, chemicals and custodial hardware prior to beginning procedures. Read safety instruction on MSDSs and chemical product labels and comply as directed.
2. Move all moveable objects from area(s) to be scrubbed.
3. Dust Mop floor with an untreated synthetic dust mop to remove loose soil. Use scrapper to remove gum, etc. Dispose of litter.
4. Place Wet Floor Signs at access area(s) to foot traffic.
5. Clean base boards if necessary.
6. Mix ES84 with cold water in a clean bucket with wringer.
7. Apply scrubbing solution liberally to manageable area of floor.
8. Allow scrubbing solution 3 to 5 minutes dwell time. Do not allow dry back. Re-wet floor if scrubbing solution begins to dry final pick up procedure.
9. Wet mop or scrub area with 175 RPM rotary floor machine using a scrub pad and pick up solution with wet mop or wet pick up vacuum.
10. Burnish floor with 1000 to 2500 RPM Burnisher using suitable burnishing pad. Do not use a rubberized burnishing pad. Dust mopping after burnishing is not required.
