

## **WET MOPPING**

1. Assemble all chemicals and custodial hardware prior to beginning procedures. Read safety instructions on MSDSs and chemical product labels and comply as directed.
2. Move all moveable objects from areas(s) to be wet mopped.
3. Dust Mop floor with a synthetic untreated dust mop to remove loose soil. Use scrapper to remove gum, etc. Dispose of litter.
4. Place Wet Floor Signs at access area(s) to foot traffic.
5. Clean base boards if necessary.
6. Mix ES84 with cold water in a clean bucket with wringer.
7. Immerse clean, dedicated, daily cleaning wet mop in solution and press mop lightly in wringer to remove dripping.
8. Flood cleaning solution on to a manageable area of the floor framing in edges and filling in centre using figure-8 pattern.
9. Wring out cleaning mop thoroughly and pick up cleaning solution previously applied. Remove any abrasions or black marks from floor, while making final pick up, with an abrasive pad attached to the mop handle or by dragging an abrasive pad beneath one foot.
10. Flush out mop and recharge bucket with clean solution as necessary and continue wet mopping procedure.
