

Why Go Green in a Red Economy?

**If you need to cut costs—
Which piece should you cut?**

The first place managers look to cut costs is in Chemicals, Equipment or Supplies...

...However, cutting from the Chemical, Equipment and Supply Budget will reduce worker productivity and increase the cost of labor and your total cost of cleaning.

Alternatively—look for ways to increase worker productivity to reduce your overall cost of cleaning.

An integrated Green Cleaning Program using High Performance Products will:

- Increase worker productivity
- Protect the health of cleaning professionals
- Protect the health of building occupants
- Reduce the amount of job-related injuries
- Reduce task exposure time
- Reduce energy and water consumption
- Reduce employee absenteeism
- Increase employee morale and level of service
- Increase employee retention and decrease turnover
- Help market your business and create new revenue

The Bottom Line: Green Cleaning will save you money when you choose Enviro-Solutions Products and Distributors.

Enviro-Solutions Products and Distributors Are:

- Competitive to major brands in performance & price
- Safer for the End-user and workplace environment
- Able to Single Source all Certified Green Products
